

## Automatically changing PPlans from NCPDP 5.1 to D.0

1. Select Programs, then Other from the RxWin program. Type D0PLANS and press <ENTER>. (Please note 0 is the number zero and not the letter O.)

You will have the option of printing a report showing the plans that were changed to D.0, or you may simply run the program without printing a report. An example of the report is shown below:

```
10/27/11                                MEDICAL PHARMACY                                Page 1
                                         SET PLANS to D.0

Plan#  Plan Abbr  Plan Name          BIN#    PCN#
-----
  10    PAID        PAID                610014
  62    ScripCrd     ScripCard           610056
 216    MEDPRIME     MEDPRIME            610014  MEDPRIME
 227    BRAVO        MEDDPRIME           610014  MEDDPRIME
```

Once the program is finished, the total number of PPlans will be displayed on the screen along with the number of PPlans changed from NCPDP 5.1 to D.0.
